

DataWipe

data erasure with certificate

Ideal for refurbishers!

You can delete many mobile devices simultaneously in an audit-proof manner, increasing your device throughput and revenue. With the deletion certificate with your company logo you increase your level of awareness, with the automatic installation of OS and firmware you increase the resale value of your mobile devices - you can prove to your customers that there are no more viruses, Trojans or foreign data on your products!

Don't worry about changing employees and returning leased mobile devices!!

You want to return your leased company mobile phones or one of your mobile devices changes hands within your company? DataWipe saves you the worry that internal or customer-specific data could fall into the wrong hands. Audit-safe and GDPR-compliant!

stockpile management

DataWipe also offers you a quickinfo function: IMEI, serial number and the most relevant device data can be read and exported at the push of a button. Ideal for archiving, inventorying and uniquely assigning the total inventory of all mobile devices in circulation in your company to one employee!

With DataWipe you delete existing data on your mobile devices quickly, irreversibly and automatically. After deletion, you will receive a DSGVO-compliant certificate that can always be clearly assigned to a deleted mobile device. Including modern cloud connection, integration of your company logo on all certificates, label printing function, statistics and export functions for your merchandise management system.

Your advantages :

You save money and time through automation (up to 60 deletions possible simultaneously) and have an additional source of revenue by offering an on-site deletion service for your customers.

You save manpower, because from now on one of your technicians can automatically delete many devices at the same time!

Your company logo on all cancellation certificates. Improve your image and advertise your company for free!

Risk minimization through GSMA check and audit-proof certificate. As managing director you are liable for business and customer data falling into other hands!

Keep track of the key figures of your deleted models and their manufacturers in order to calculate your business model more accurately.

Compliance implementation made easy: DataWipe structures and documents the procedures of your employees at all locations, while you as administrator keep an eye on everything.

Tested and confirmed by A Star Forensics: Your data can no longer be restored with DataWipe! ADISA DataWipe has certified this for risk levels 1&2!

Installs the latest iOS for Apple products after deletion and, if desired, also automatically installs the latest firmware! This means that you can pass on or sell your mobile device directly after it has been deleted.
